

Summer Homework - Mathematics

Our students will continue to work on their basic math skills throughout the summer using “Math Facts in a Flash” – an online mastery program that the district purchased for all students. Each student was given a *Summer Homework Mathematics Goal Sheet* in which each student was assigned an individualized target by their current math teacher.

Students can log into ***Math Facts in a Flash*** by going to the district webpage (www.barbertonschools.org), clicking on “Students” and then clicking on “Math Facts in a Flash”.

In order to receive **Full Credit**, students need to attain their target level by **Friday, August 24, 2018**.

In order to receive **Half Credit**, students need to attain their target level by **Friday, September 7, 2018** – no credit will be given after this date.

Students that have reached **Level 56** on the program will **not** be required to complete a summer assignment and will receive full credit.
